EDUCATION

National University of Singapore | Singapore
Master of Science in Business Analytics Aug '26 - Sep '27
The Chinese University of Hong Kong, Shenzhen | Shenzhen
Bachelor of Engineering in Computer Science and Engineering Sep '22 - Jun '26
Minor in Economics

PROFESSIONAL EXPERIENCE

Anker Innovations | Shenzhen
Go-To-Market (GTM) May '26 - Jul '26

- Evaluated 5+ portable speakers from Soundcore against JBL and other key competitors on Amazon US across pricing, features, and market positioning, clarifying category's competitive landscape
- Utilized internal analytics and artificial intelligence-assisted research across the \$1-\$500 price spectrum, pinpointing price bands with stronger competitive potential for Soundcore
- Translated market and competitor findings into decision-ready reports that guided the GTM team's evaluation of viable price ranges and product differentiation opportunities

Shenzhen GODO Innovation Technology Co., Ltd. | Shenzhen
Solution Engineering and Product Management Intern Jun '25 - Aug '25

- Benchmarked 10 multimodal models across four urban-management tasks for accuracy, latency, and stability, informing model selection for integration into a drone flight-control system
- Mapped 30 leading Chinese investment firms by different aspects, strengthening company's business plan for fundraising
- Assessed the commercial viability of Disney-style drone fireworks shows by studying 3 other Disneyland, translating market insights into recommendations for a client proposal

Guangzhou Landou Software Technology Co., Ltd. | Guangzhou
Digital Operations Solution Assistant Jul '24 - Aug '24

- Analyzed operational data from 100+ hotel-system users using SQL and Python, identifying peak staffing needs through occupancy and service-delay trends
- Delivered a visual performance report guided staffing decisions, improving service efficiency about 50%

PROJECTS

Pet Service Platform Design (Ongoing)

- Defined end-to-end user journeys for pet owners and store staff, ensuring six core functions covered the complete booking-to-service lifecycle
- Adapted insights from two competing platforms into product requirements and an AI-assisted Figma prototype, enabling workflow validation before development

Unity Game Development (Team Project)

- Designed a branching player journey across three major levels, using past-and-future switching to connect exploration choices with different story outcomes
- Converted gameplay concepts into a complete Unity demo by implementing movement, animations, interfaces, and interaction logic across a hub and final scene

Kaiyun's Toolbox — Independent Product, WeChat Mini Program

- Independently launched an AI-assisted WeChat Mini Program integrating inventory management, expense tracking, and user settings for convenient on-the-go record keeping
- Translated user feedback into expiration reminders and designed friendly layouts and typography to simplify item management for older users
- Engineered local storage and validated Excel import/export with cross-time-zone date handling, preventing date shifts while supporting reliable backup, migration, and sharing

ADDITIONAL INFORMATION

Technical Skills: Python, Java, SQL, JavaScript, TypeScript, React, HTML/CSS, MySQL, PostgreSQL, pandas, NumPy, scikit-learn, Tableau, Figma, Unity
Languages: Mandarin Chinese (Native); English (Fluent); Cantonese (Basic Conversational)
Interest: Animal Welfare — Volunteered with the university's animal welfare organization, bottle-feeding and caring for two rescued newborn kittens for one week.
